PROFESSIONAL SUMMARY

Resourceful front end engineer striving to improve my skills and fix pesky bugs. Switching careers to software development is not only a daunting and difficult challenge, but an opportunity to perpetually learn and grow. The constant shifts and everchanging landscape in software development excites me and is a big reason why I've enjoyed the journey. Below you'll find projects I've created that showcase my skills and general background in software development.

EXPERIENCE

Personal Project - *Movie App*

Web app featuring movies and tv shows from The Movie Database (TMDB) API. The app displays several different categories of movies or TV show and also more general information on the selected media. A search and filter option is also included to allow for more select searches. This app was created using react, the axios library, styled components, and react-router.

Personal Project - *LeCloud*

LeCloud is a landing page for a fictional cloud hosting website. This project focused on writing clean vanilla css and util classes that allowed for reusable styling across the application. I also made this website completely responsive, so it adjusts to different screen sizes.

Personal Project - *Euro 2021 Landing Page*

This is a landing page for the Euro 2020 soccer competition. I focused on the design of the website and created it using React and styled-components.

Personal Project - *Crypto Tracker*

This Crypto Tracker web application displays popular crypto currencies and select corresponding data. You can filter and search for a particular coin as well. This project utilized the axios library to make API calls to the CoinGecko API. React hooks, axios, and styled components were used to create this website.

SKILLS

- React,
- Javascript(ES6)
- HTML
- CSS
- Sass
- Git(version control)
- Styled Components
- React Hooks
- Bootstrap
- Responsive design
- Interpersonal skills
- Debugging
- Back-end basics
- Interpersonal and communication
- Analytical skills
- Axios

EDUCATION

University of California, Berkeley

Berkeley, CA
2018

Bachelor of Arts

Molecular And Cellular Biology
